

HYDRAULIC Pile-cutter

for cutting reinforced concrete piles

- Clean cut of concrete and steel between the blades.
- Very fast operation due to cutting with two moving blades.
- Cutting piles close together is easy due to slim design. (only 11 cm!)
- Operation and maintenance are very easy and don't require special skills.
- Low operate costs, high efficiency.
- Environmental safe, no noise, no vibrations.
- The cutter is designed for cutting piles above and under water.
- With closed blades the special suspension equipment ensures safe carrying of a cut-off piece.

Type	Range (cm)	Pressure (bars)	Flow (l/min)	Weight (kg)	Excavator weight (ton)
16	0 - 42	350	Minimum 32	900	Minimum 12

Taets manufactures hydraulic pile-cutters for cutting over-lengths of foundation piles. When you choose for Taets you choose for an established company with more than 36 years' experience in manufacturing hydraulic construction equipment.
